ANADOLU LİSESİ

## Distinctive departments

---

- We have four departments at our school.
- ICT
- Chemistry
- Land Registry
- We have the unique school giving education of Chemistry and Land Registry Departments education around the province.

Land Registry-cadastre.

Another part of our school is the informatics department.

---

- Information Systems and Technologies Department;
- It aims to train specialists in the field of development and application of mathematical models of processes and objects, mathematical techniques, software and tools to address science, technology, economics and management problems.

Another section of ours is  
the chemistry  
department.

---

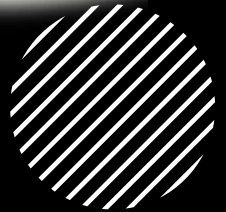

- This department is a department that offers undergraduate education in most universities. There is a 4-year training period.
- Chemistry department is among the most preferred numerical departments. Graduates receive the title of "chemist"

disciplined and  
concentrated

- **Our school is also a preference because of our disciplined system. For the last 10 years, none of our students have been in criminal cases. By the help of our school ,the proximity has become more secure place.**

## Leader Technical School around the Province

---

- Our school is the coordinator of the schools around the province. This provides us to lead them and organize events easily. We also share good examples mutually.

# Physical Facilities

# Strong Erasmus+ Projects Team

- In 2020, we have started 2 different Erasmus project. **Kankama danısayım, ICT tools in Classroom.**
- In 2018, We implemented a Vocational Strategic Partnership Project. **"lot For New Business"**
- In 2017, we participated as a partner in the project of **"bringing Land Registry Cadastre Students to European standards "**and 8 students were trained in 14 days in Czech Republic with 3 teachers.
- In 2015, our project **"Creative Teaching Effective Learning of English in Vocational Schools "** was awarded to be supported. Within the scope of the project, our English teachers aim to provide a transition of our school to a different dimension in language teaching with their education from England.

# We have Strong Erasmus+ Projects

# THANK YOU
